

Second iteration demo

Wei Luo (wl2671), Zhuangyu Ren (zr2209), Chi Zhang (cz2517), Danyang He (dh2914)

1. We finished our demo on 4pm, 30 Nov. The main issue encountered during the demo was that for some error handling cases, our program didn't perform well enough
2. The use cases we demonstrated are Search Professor, Search Course topics and recommend courses, since first iteration, we added one more use case, that is search course topics, and for other two, we adding reviewing score system and also student' comment on them.
3. We are still using travis CI, adding two new tools, the first one is Jacoco coverage report, which is integrated into maven. Second one is CodeCov, the travis CI will upload the Jacoco report to it, and it will show the graphical coverage report online. The url is <https://codecov.io/gh/pow25/vergilplus/branch/master> (it can also be accessed through clicking on the badge of github homepage)
4. <https://github.com/pow25/vergilplus> , the new tag is V2.0
